

Staglin Center for Cognitive Neuroscience

Pilot study request information

CCN Pilot Policy: *At this time, we can only afford to provide pilot funds for imminent grant submissions that intend to use CCN resources. There is an exception for PIs that have spent over \$100,000 at the center, and have therefore accrued additional pilot time to use at their discretion. First time users can receive up to 12 hours of scan time. Repeat users can receive 6 hours per calendar year. We hope with continued success to increase these numbers whenever feasible. The Staglin CCN Executive Group reviews all pilot study requests. A member of the committee will meet with each requesting PI to understand the project and then present it to the Executive Group for final approval.*

–Susan, Mirella, Adriana, Agatha, Martin, and Jesse.

GRANT INFO:

Funding organization:

Already IRB Approved?

Submission date: Month:

Day:

Pilot Title:

PI Name:

Aim (explain why the pilot data is needed, how will it strengthen the application):

Summary of design and hypotheses tested:

Total scan hours requested:

Scan Details (specify sequence type, length in min and # included in each scan)

Anatomical:

Functional:

DTI:

Other:
